

“Y’all made my day  
so much better! I didn’t  
know I could get help  
like this.”

— *client who came in  
desperate for baby  
formula*

champions for life

### Finally, as supporters,

we have our clients’ backs. Besides prenatal and parenting classes, we provide material assistance and supplies for families with children up to 36 months old, and even large-scale baby items such as strollers and car seats. Clients receive emotional and relational support through mentoring and classes — even loss recovery for those who chose to terminate a pregnancy in the past or who experienced a miscarriage.

For more information on all The Life Center offers at our four locations, go to [tlcdonor.org/services](https://tlcdonor.org/services)  
Midland | Odessa | Andrews | Big Spring

Over the past 10 years,  
**64,807 clients** have  
received material  
assistance and  
educational support  
through The Life Center.

## The Impact Report

August 2024

The *Life*  
Center

### For many years,

The Life Center has been a staunch defender of life for the unborn in West Texas. As **champions for life**, we also protect and support life *after* birth. Our mission is to empower individuals and families to choose life and sexual wellness through teaching, helping and healing programs. We **protect, defend and support** our clients. We become their family and they become ours.

### As protectors,

we test and treat sexually-transmitted infections and diseases through our STI Clinics in Midland and Odessa, and we also educate patients on ways to avoid sexual risks.

Teams from our Prevention Education Department travel to schools within a 200-mile radius of Midland to teach students in grades 4 through 12 how to establish and maintain healthy relationships, set goals and boundaries, and achieve — and protect — their sexual health.

“I was waiting, because it was a safe and smart option and I can build a relationship. And after this program I will still wait because I don’t want regrets or to ruin someone else’s life.” — *6th grade boy*

Over 10 years, **205,504 students** have been taught in classrooms across the Permian Basin.

In the past 12 months, after receiving comprehensive education on sexually-transmitted infections and diseases, **nearly 40% of patients ages 15 - 29 chose abstinence.**

During the past 10 years, **2,601 sonograms** have been performed by registered nurses, and **6,805 moms chose life.**

### As defenders,

we educate clients on the risks and consequences of abortion, help them make life-affirming decisions for parenting or adoption, and use fetal sonograms to take clients through their baby’s life from conception to birth. We offer support through pregnancy and beyond — at no cost to them.

“When I saw my baby ‘showing off’ in the ultrasound, I knew I could parent with your help.” — *abortion-minded client*
